

IEEE—Serving the Needs of Industry

## Employee Recruitment through IEEE

An organization is a reflection of the employees who work within it. Gaining and keeping a competitive edge in any technical field requires the right resource tools and unique networking possibilities of IEEE.

IEEE and its many local sections and societies give employees the environment they need to develop their technical skills further because they are among some of the top technical leaders in industry today.

### Employees Who Publish with IEEE

Through its many publications, IEEE enables your researchers to share their technological advancements with other industry leaders, making a strong and visible statement about your company.

### Discover New Industry Leaders

#### Recruit through IEEE Job Fairs

IEEE has many student branches located around the world. When these young technical professionals graduate, they join IEEE programs designed to help them look for work with quality organizations like yours. IEEE Job Fairs are a great way to find and recruit these candidates before your competitors do.

#### Recruit through the IEEE Job Site

Post job listings and search through senior-level managers, top engineers and technology experts in every sector. You will find pre-qualified candidates with resumes that match your organizational needs and make job offers to these top-notch candidates before your competitors even know about them.

Members discover that IEEE is more than a worldwide technical association. IEEE provides global networks and opportunities that would benefit any technical professional, no matter where they are located. IEEE gives employees the reach they need to develop further.

# Local IEEE Sections—Enable Your Employees

IEEE's local sections and technical societies partner together to encourage the professional and personal development of its members. The result enables employees to work on projects more efficiently and focus more on innovation.

"The two most important factors of being an engineer are staying up with cutting-edge technology and networking. What I think IEEE provides is the best combination of both worlds. Because of that, membership is just priceless."

**Megha Basu**, IEEE Graduate Student Member, Cornell University Laboratory

## Nurture Your Employees

### Volunteering and Project Planning

Employees can participate locally within their IEEE section—the activities are related to the technologies they work with everyday. Your employees can gain valuable time management and leadership skills as they learn how to team build and motivate other individuals.

### The IEEE Continuing Education Providers Program (CEP)

The CEP Program teams with universities and private continuing education providers in your area to offer IEEE section members significant discounts on continuing education, and certificate and graduate degree courses.

### The IEEE eLearning Library

This premier online collection of over 200 short technical courses and conference workshops are expert-written and peer-reviewed. Your employees could earn CDU and PDH credits at their own pace, no matter where they are in the world.

Please feel free to contact us if you have any ideas so we can explore ways to partner with you.

Ask your local IEEE section leader about any local events, sponsorship or marketing opportunities your organization could get involved in.
